Problem C. Round One

Time limit 2000 ms **Mem limit** 1048576 kB

Problem Statement

Takahashi is solving quizzes. He has easily solved all but the last one.

The last quiz has three choices: 1, 2, and 3.

With his supernatural power, Takahashi has found out that the choices A and B are both wrong.

Print the correct choice for this problem.

Constraints

- Each of the numbers A and B is 1, 2, or 3.
- *A* and *B* are different.

Input

Input is given from Standard Input in the following format:

 $egin{bmatrix} A \ B \end{bmatrix}$

Output

Print the correct choice.

Sample 1

Input	Output
3 1	2

When we know 3 and 1 are both wrong, the correct choice is 2.

Sample 2

Input	Output
1 2	3
